- (A) that there is an infringing device or product actually on the market and/or an infringing method in use;
- (B) that a rigid comparison of the alleged infringing device, product, or method with the claims of the application has been made, and that, in the opinion of the attorney of record, at least some of the claims are unquestionably infringed;
- (C) that the attorney has made or caused to be made a careful and thorough search of the prior art or has a good knowledge of the pertinent art; and
- (D) that the attorney believes all the claims are allowable.

Further, the attorney is providing copies of references (not of record) deemed most closely related to the subject matter encompassed by the claims of the above noted application. A list of the references with copies are attached as **Exhibit 2** to **Exhibit A**.

The petitioners therefore respectfully petition that an order be issued directing the above noted application to be made special so that said application may be given immediate action on the merits.
